

Shipping Trainee

Job Overview:

Are you ready to launch your career in the shipping industry? Navigator Gas offers a 2-year Shipping Trainee Programme, starting 1 September 2026, combining hands-on experience with structured education.

As part of the programme, you will enrol in the Danish Shipping Education programme, attending courses in Maritime Law, Maritime Economics, Ship Design, Energy & Fuel, Logistics, and Supply Chain Management through a mix of in-person sessions and online webinars.

You will gain practical experience at our Gentofte office in the Commercial Operations team, working on Port Management, Bunker Procurement, Vessel Scheduling, and Contractual aspects. You will also rotate across Chartering, Ship Accounting, and Technical departments to build a comprehensive understanding of shipping operations.

Throughout the programme, you will have a dedicated mentor to support your development and spend a period of time in one of our offices abroad, gaining international exposure.

This is a unique opportunity for motivated individuals to build a strong foundation and long-term career in shipping.

During Your Theoretical Training, You Will Have the Opportunity to:

- **Actively participate** in discussions, ask questions, and contribute to group activities or presentations.
- **Reflect on your development**, identify strengths and areas for improvement, and seek guidance when needed.
- **Show initiative in learning** by exploring additional resources and pursuing opportunities to enhance your skills beyond the training programme.

The theoretical courses will be delivered by the Danish Shipping Academy as part of the Danish Shipping Education programme. More information about the theoretical training is available [here](#).

Please note that the information available online refers to the current programme; however, it provides a good overview of the topics typically covered.

What You Will Gain

- **A strong start to your career** in a dynamic and globally connected industry.
- **In-depth knowledge of the shipping sector**, including exposure to key operational and commercial areas.
- **A valuable professional network** built among highly skilled, motivated, and international colleagues.
- **Hands-on experience** across all aspects of the shipping industry, complemented by structured training and development opportunities to accelerate your career growth.

In addition, specific learning objectives will be introduced as needed to support the development of each function. You will be part of an international team collaborating closely across our offices in Copenhagen, London, Gdynia, and Manila.

At Navigator Gas, we believe that a great working environment is built on a strong social culture across departments and locations. To foster this, we host regular social events throughout the year, maintain an open and collaborative office space, and enjoy a recurring Friday bar.

Requirements

- A Bachelor's degree or secondary education (e.g., STX, HHX, or equivalent) combined with relevant practical experience.
- Ability to work effectively both independently and as part of a team.
- Strong attention to detail and commitment to accuracy in all tasks.
- Excellent interpersonal skills and a genuine desire to contribute to a positive, collaborative work environment.
- Comfort and adaptability in a dynamic and changing environment.
- Eagerness to learn and develop new skills.
- Fluent in English, both spoken and written.
- Proficiency in MS Office applications.

How to Apply

Excited to start your journey with Navigator Gas? Applications are open until the end of November, so don't miss your chance to apply! Upload your CV along with a cover letter telling us why you are interested in joining us and what you hope to contribute. We love getting to know our candidates, so make it personal and enthusiastic!

If you have any questions about the role or our company, our People & Culture team is here to help, just drop us a line at people@navigatorgas.com

About Us

Navigator Gas is operating the world's largest fleet of handy-size liquefied gas carriers. With our 57 ocean-going vessels, we provide international seaborne transportation and regional distribution of liquefied petroleum gas (LPG), petrochemical gases and ammonia for energy companies, industrial users and commodity traders. The Company plays a vital role in the liquefied gas supply chain with its sophisticated vessels providing an efficient and reliable 'floating pipeline' between the parties, connecting the world today, and creating a sustainable tomorrow. This includes focus on developing and supporting the value chain for the production and transport of CO₂ and Green Ammonia which are essential components of the global transition away from fossil fuels.
