

# Vessel Manager Technical

## Job Overview:

Are you looking for your next career challenge? Would you like to work in an international environment and expand your knowledge of technical operations? We are looking for a talented Vessel Manager Technical who is ready to join our Navigator Gas office in Copenhagen in a position that offers a unique opportunity for career development. The position is for 6 months currently.

Once you are inducted into the company and the role, you will be assigned a number of vessels to manage. Your responsibilities will include ensuring seamless integration between the vessels and the office. You will work closely with the crew on board to deliver safe and efficient operations. You will be responsible for managing the performance, condition, maintenance, and repairs of your assigned vessels within the budget. This includes inspecting the vessels, developing budgets, and managing dockings and major overhauls. Additionally, you will ensure compliance with regulatory and industry standards, as well as our company's high standards. Moreover, you have a particular focus on safety and environmentally critical equipment, and you do not hesitate to intervene to ensure that our high standards are maintained.

## Among other interesting tasks, your responsibilities will include:

- Reviewing safety and emergency equipment conditions, verify certification, and maintain documentation compliance.
- Being an ambassador for our WeCARE safety culture programme.
- Managing technical maintenance, inspections, surveys, repairs and dockings.
- Close follow-up on the vessels' maintenance ensuring optimal operational efficiency.
- Resolving technical issues on the assigned vessels.
- Close cooperation with the purchasing department on spare parts.
- Ensuring the daily operation of the vessels according to legislation.
- Responsible for the vessels' budgets.
- Developing into a role where you will have the overall management of the assigned vessels.

## To succeed in the job:

You should be passionate about doing an excellent job and always consider the needs of your stakeholders. Additionally, a positive work environment is very important to us, so we seek a candidate who can contribute to a positive social and supportive team atmosphere.

You should be flexible, committed to operational excellence, and curious about all aspects of vessel operations. As a true team player, you understand the importance of building good relationships with your colleagues to achieve outstanding results.

## We are looking for the following qualifications and competencies:

- Marine Engineer/Dual Officer with excellent results.
- Marine experience as an engineer, preferably from the tanker industry.
- Naval Architect with relevant experience.
- You have thorough insights into safety, quality, and vetting areas.
- You are motivated by a busy environment where priorities are constantly challenged, and innovation is daily business.
- Customer focus and ability to communicate easily with both technical and commercial staff.
- Proficient level of English, as this is our corporate language.
- EU work permit is a requirement.

Candidates with various backgrounds and seniority will be taken into consideration and the successful candidate will have the opportunity to develop into the role.

## We Offer:

We offer a competitive salary that reflects your experience and qualifications, along with an attractive benefits package. We value freedom and flexibility, striving to maintain an ideal work-life balance for our teams. We believe that a vibrant working environment thrives on a strong social atmosphere, both within departments and across the company.

## Apply:

Send your application as soon as possible but no later than the 7th of April. Applications will be reviewed ongoingly and we will conduct interviews during the application period.
