

Student Assistant for Optimisation and Digitalisation - Procurement

Would you like to work in a dynamic and international environment, and are you a person with a flair for numbers? There are plenty of possibilities to test and develop your skills in a company with increasing focus on data and analytics. This is an opportunity to gain valuable experience within performance optimisation and digitisation, in the maritime industry.

Job Overview

Navigator Gas manages a fleet of gas tankers, traded worldwide. In an ever-changing world where new regulations and standards challenge the industry, the ability to collect and analyse large quantities of data, and to conclude and act on the findings, is essential for being successful. We need you to assist us in this process.

As a company, we are dedicated and ambitious in the pursuit of ever more sustainable and efficient ways of running our business. You will be given a central role, that will be visible and impactful, and important in achieving our goals for 2027 and beyond. You will work with colleagues in multiple departments and with tasks related to analysis, reports, presentations, data organisation, scripting and various ad hoc jobs.

Among the tasks, you will have the opportunity to work with, are the following:

- Develop Advanced Procurement Performance Analytics
- Drive Predictive Insights & Trend Indicators
- Benchmarking & Performance Transparency
- Deep-Dive Analysis of End-to-End Process Efficiency
- Map AI development opportunities
- Cost & Logistics Optimization Insights
- Support Data-Driven Decision Making in Procurement

You will report to our Head of Procurement and have involvement in trans-departmental projects and initiatives relevant for your skills set.

About you:

You are currently studying your Bachelor's / Master's degree in engineering, business administration, IT, economics, data science, computer science or other relevant education you cannot wait to get your hands even deeper into the practical analytical side. You are interested in working in a high paced international environment.

You'll be working with data and IT tools to support our team and help turn analysis into real results.

You're a good fit if you:

- Like working with data and finding insights in numbers
- Take pride in generating results by delivering your work at the set deadline without compromising quality
- Are curious, tech-savvy, and eager to learn new tools and methods
- Demonstrates ownership by following through on tasks and seeking clarification when needed.
- Are confident engaging key stakeholders and challenge views effectively.
- Know your way around Microsoft Excel, Power BI and other Office tools
- Fluent in oral and written English as this is our corporate language

We offer a flexible working week of 10-20 hours, with more hours required during holiday periods. Furthermore, we believe in freedom and flexibility under responsibility so the office hours can be adjusted to accommodate your school schedule.

Application

Please submit your application and CV via the "Apply" button as soon as possible and no later than 2 August 2025. Applications will be reviewed ongoingly, and we will conduct interviews in the beginning of August.

Start date for the position will be September 2026.

Navigator Gas is an Equal Opportunity Employer. Prospective employees will receive consideration without discrimination because of race, colour, religion, creed, gender, national origin, age, disability, marital or veteran status, sexual orientation, genetic information, citizenship or any other legally protected status.

We kindly ask you to not have a picture on your CV as we wish to encourage an unbiased recruitment process.
